Summary

I am a professional software developer, highly skilled in HTML, CSS, Javascript and proficient using the React framework. I adhere to standards of progressive enhancement, accessibility, and separation of concerns. I am an eager learner and aspiring full stack developer. I am currently looking for an opportunity at which I can be constantly challenged to continue growing my career. I consider myself a creative problem solver and I love the thrill of a challenge, I started off as a mechanic at a young age and after 8 years in the field I felt like I could use my problem solving and diagnostic abilities in a better environment. After a lot of research and practice I fell in long with the tech scene and programming. I took the leap to make this my career, I've put in the work to get good and I'm not going to stop until I'm the best.

Work Experience
